Regarding the Free Engineering Technical Assistance through OML/OMUP:

I visited with Ms. Dorrance at OML for quite some time and then we reached a point where she was needing more technical information than I could provide, so, Joe visited with her. Now, we are awaiting a packet with which the completion will determine whether our situation is compatible with this grant program. Perhaps we'll know more by the time the Board meeting arrives.

Land & Water Conservation Fund program through the Department of Tourism: (golf course irrigation grant). Our first draft is submitted for review.

Bad news alert: Housing developer Brent Cook was unfortunately unsuccessful in obtaining local finance to create housing.

**There should soon be an interesting announcement made regarding a fairly local project that involves Buffalo, Northwest Oklahoma Alliance, and High Plains RC&D.
(Just thought I'd conclude my little brief with a little something to peak your interest!)**

*Thank You!
James*
